KWIK Computing Limited, a
UNBS ISO 9001:2015
Certified Company
Certificate No. **UNBS/QMS/0031**

About Us

Kwik Computing Ltd was incorporated in the year 2000 with the aim of providing high quality printing services to it's customers.

More than 20 years later, Kwik Computing Limited has become one of the leading service providers to multi-international organisations, NGOs, Government departments and many businesses as well as individuals

Kwik Computing Limited is dedicated to creating timely and tailored design, printing, stationery, and branding experience for the client coupled with an affordable and quality product. Our product portfolio has expanded from paper printing to textile printing, branding, engraving, label printing, promotional products and, design.

For 20 years we have been dedicated to providing quality products to our clients.

As Kwik Computing we look forward to meeting you, our customers in order to find out how best we can meet your printing needs. We are eager and proud to implement many interesting projects together with you, our customers.

Concept

Kwik Computing Limited is a full time printing, branding, designing and stationery supply company that offers a wide range of high end quality products.

With over two decades of experience, we have a strong background in printing and stationery supplies. We offer affordable printing services; offset printing, digital printing, screen printing, embroidery, engraving to mention but a few, without compromising quality and timely delivery.

Our strength lies in hands-on knowledge and an expansive network that we have built into an efficient system of service delivery.

“

Our experience in printing, graphic design, branding and stationery supply spans more than two decades .

”

GO BEYOND BASIC CMYK.

Transforming your printing possibilities with fifth colour

Add extra value to your print services with fifth colour and add impact to your print.

Whether it's a clear varnish to accentuate designs, white as an undercoat or a security code that can only be seen under ultraviolet light, add impact to your offerings. Our Ricoh machine's colour range now includes white, clear, neon yellow, neon pink and invisible red. To stretch imaginations, you can also switch colour stations, to add further impact to your print work. Imagine one job being able to include both white and clear for example.

- Fifth colour adds impact, appeal and value to commercial print.
- Use a clear varnish to add a watermark or accentuate a graphic design.
- Print a white background directly on coloured and translucent media.
- Invisible red toner can be used for entry level security print applications such as ticketing.
- White + CMYK can be printed in a single pass enhancing impact on coloured media, and increasing productivity.
- By adding neon colours we can extend the colour gamut further, to support meeting brand colour requirements.

Outstanding **image quality**

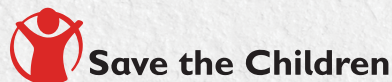

The Ricoh Press produces repeatable colour outputs with a look and feel that is comparable to offset – with no compromise on quality.

- Print quality that is comparable to offset.
- Vivid lifelike colours, smooth tonal gradation and fine lines.
- Precise front/back registration with added automatic quality control.
- Create new products that were previously out of reach on a digital system.
